EYE HORTILUX[®] NH940B/HTL/EN Lamp Warranty Clarification

Dear EYE HORTILUX Customer,

We made improvements to the NH940 lamp in 2018 to reduce the variance of color shift. Lamps manufactured after August 2018 have an additional Performance Warranty that is unique to the horticulture industry, provided they are operated on an ANSI M47 ballast. These lamps were designed at 2100 Kelvin and anticipated to be used for two grows or 2,160 hours. We allow a +/- 10% variation in color temperature for this lamp which should not have any negative impact on the plant or crop.

In the unlikely event that you experience a color shift higher than 2310 Kelvin prior to 2,160 hours in use, please notify our customer service/technical support department.

Thank you for your understanding and support of HORTILUX.

If you have any questions, please contact us at 877-905-2562.

Best regards,
EYE HORTILUX[®]
